Subject Index

A Value Method
The Wind-Frequency Allocation Method on Discharge Loading of Function Zones, 714

A&WMA
Degradation Characteristics of Toluene, Benzene, Ethylbenzene, and Xylene by *Stenotrophomonas maltophilia* T3-c, 400

Accuracy Assessment
Design of a Cost-Effective Weighing Facility for $PM_{2.5}$ Quality Assurance, 506

Acid Deposition
Sector Analysis of pH Values in the Northeastern Region of Puerto Rico, 719

Acid Weathering
Sector Analysis of pH Values in the Northeastern Region of Puerto Rico, 719

Acidic Precipitation
On the Relationship between Acid Rain and Cloud Type, 334
Sector Analysis of pH Values in the Northeastern Region of Puerto Rico, 719

Acidity
Sector Analysis of pH Values in the Northeastern Region of Puerto Rico, 719

Activated Carbon
Simultaneous Control of Hg^0, SO_2, and NO_x by Novel Oxidized Calcium-Based Sorbents, 273

Adsorption
Removal of PCDD/F from Incinerator Flue Gases by Entrained-Phase Adsorption, 1378

Adsorption Model
Removal of PCDD/F from Incinerator Flue Gases by Entrained-Phase Adsorption, 1378

Aerosols
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3
Aerosol Laser Ablation Mass Spectrometry of Suspended Powders from PM Sources and Its Implications to Receptor Modeling, 27
Real-Time Indoor and Outdoor Measurements of Black Carbon in an Occupied House: An Examination of Sources, 41
Secondary Organic Aerosol Formation from the Irradiation of Simulated Automobile Exhaust, 259
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Prediction of Pressure Drop in an Orifice Scrubber Based on a Lagrangian Approach, 308
Comparison of Fine Particles and the Relationship between Particle Variations and Meteorology at an Urban Site and a Remote Site in the Eastern United States, 573
Sources of Atmospheric Carbonaceous Particulate Matter in Pittsburgh, Pennsylvania, 732
Diagnostic Study of Critical Circuits of the Kraft Pulp Production Process Considering the Environmental Aspects, 765
Particle Size Relationships at the Fresno Supersite, 822
Regional Transport and Urban Contributions to Fine Particle Concentrations in Southeastern Canada, 855
Concentration and Size Distribution of Ultrafine Particles Near a Major Highway, 1032
Estimation of Ambient $PM_{2.5}$ Concentrations in Maryland and Verification by Measured Values, 1161
Identification of Sources Contributing to Mid-Atlantic Regional Aerosol, 1186
Microfibrous Mesh Coated with Titanium Dioxide: A Self-Sterilizing, Self-Cleaning Filter, 1206
Development and Laboratory Performance Evaluation of a Personal Cascade Impactor, 1230
Hg Reactions in the Presence of Chlorine Species: Homogeneous Gas Phase and Heterogeneous Gas-Solid Phase, 1316
Electrostatic Precipitation of Ultrafine Particles Enhanced by Simultaneous Diffusional Deposition on Wire Screens, 1342
Methodology for Siting Ambient Air Monitors at the Neighborhood Scale, 1433

Aethalometer
Observations on the Suitability of the Aethalometer for Vehicular and Workplace Monitoring, 1258

Agriculture
Surface Flux Measurements of CO_2 and N_2O from a Dried Rice Paddy in Japan during a Fallow Winter Season, 416

Air Emissions
Volatilization of Contaminants from Suspended Sediment in a Water Column during Dredging, 1214

Air Pollution
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3
Modeling the Benefits of Power Plant Emission Controls in Massachusetts, 5
Levels and Characteristic Homologue Patterns of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in Various Incinerator Emissions and in Air Collected Near an Incinerator, 69
Factors Affecting Heavy-Duty Diesel Vehicle Emissions, 84
Quantitative Analysis of Environmental Factors in Differential Weighing of Blank Teflon Filters, 134
Source Extraction Information from Air Quality Data Monitored in an Argentinean Steel Mill, 140
Hot Emission Model for Mobile Sources: Application to the Metropolitan Region of the City of Santiago, Chile, 167
Respirable Particulate Matter at an Urban and Nearby Industrial Location: Concentrations and Variability and Synoptic Weather Conditions during High Pollution Episodes, 287
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Prediction of Pressure Drop in an Orifice Scrubber Based on a Lagrangian Approach, 308
An Atmospheric Dispersion Model for the Environmental Impact Assessment of Thermal Power Plants in Japan—A Method for Evaluating Topographical Effects, 313
Spatial Characteristics of Fine Particulate Matter: Identifying Representative Monitoring Locations in Seattle, Washington, 324
On the Relationship between Acid Rain and Cloud Type, 334
Measurement and Three-Dimensional Modeling of Airflow and Pollutant Dispersion in an Undersea Traffic Tunnel, 349
A Method for Predicting the Performance of Packed Columns Operating with a Reactive Scrubbing Liquid That Control Gaseous Air Pollutants, 396
Degradation Characteristics of Toluene, Benzene, Ethylbenzene, and Xylene by *Stenotrophomonas maltophilia* T3-c, 400

Wet Scrubber Analysis of Volatile Organic Compound Removal in the Rendering Industry, 459
Meta-Analysis of Time-Series Studies of Air Pollution and Mortality: Effects of Gases and Particles and the Influence of Cause of Death, Age, and Season, 470
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
Comparison of Fine Particles and the Relationship between Particle Variations and Meteorology at an Urban Site and a Remote Site in the Eastern United States, 573
Sector Analysis of pH Values in the Northeastern Region of Puerto Rico, 719
Sources of Atmospheric Carbonaceous Particulate Matter in Pittsburgh, Pennsylvania, 732
Diagnostic Study of Critical Circuits of the Kraft Pulp Production Process Considering the Environmental Aspects, 765
An Automatic Sampler for Measurement of Dust-Deposition Rates around Fugitive Sources, 789
Regeneration of a Compost Biofilter Degrading High Loads of Ammonia by Addition of Gaseous Methanol, 796
Photocatalytic Oxidation of Volatile Organic Compounds Using Fluorescent Visible Light, 845
Assessing Sorbents for Mercury Control in Coal-Combustion Flue Gas, 902
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Full-Scale Evaluation of Mercury Control with Sorbent Injection and COHPAC at Alabama Power E.C. Gaston, 918
Numerical Evaluation of the Effect of Traffic Pollution on Indoor Air Quality of a Naturally Ventilated Building, 1043
Forecasting Peak Daily Ozone Levels–I. A Regression with Time Series Errors Model Having a Principal Component Trigger to Fit 1991 Ozone Levels, 1064
The Catalytic Incineration of Styrene over an Mn_2O_3/Fe_2O_3 Catalyst, 1153
Online Hourly Determination of 62 VOCs in Ambient Air: System Evaluation and Comparison with Another Two Analytical Techniques, 1176
Identification of Sources Contributing to Mid-Atlantic Regional Aerosol, 1186
Volatilization of Contaminants from Suspended Sediment in a Water Column during Dredging, 1214
Development and Laboratory Performance Evaluation of a Personal Cascade Impactor, 1230
Just-Noticeable Differences in Atmospheric Haze, 1238
Hg Reactions in the Presence of Chlorine Species: Homogeneous Gas Phase and Heterogeneous Gas-Solid Phase, 1316
Electrostatic Precipitation of Ultrafine Particles Enhanced by Simultaneous Diffusional Deposition on Wire Screens, 1342
Controlling Air Pollution from Passenger Ferries: Cost-Effectiveness of Seven Technological Options, 1399
Long-Term Operation of a Biofilter for Simultaneous Removal of H_2S and NH_3, 1389

Air Pollution Control
Numerical Evaluation of the Effect of Traffic Pollution on Indoor Air Quality of a Naturally Ventilated Building, 1043

Air Pollution Standards
Prediction of Pressure Drop in an Orifice Scrubber Based on a Lagrangian Approach, 308
Comparison of Fine Particles and the Relationship between Particle Variations and Meteorology at an Urban Site and a Remote Site in the Eastern United States, 573

Air Quality
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3
Factors Affecting Heavy-Duty Diesel Vehicle Emissions, 84
Quantitative Analysis of Environmental Factors in Differential Weighing of Blank Teflon Filters, 134
Spatial Differences in Outdoor PM_{10} Mass and Aerosol Composition in Mexico City, 423
Comparison of Fine Particles and the Relationship between Particle Variations and Meteorology at an Urban Site and a Remote Site in the Eastern United States, 573
Sources of Atmospheric Carbonaceous Particulate Matter in Pittsburgh, Pennsylvania, 732
Regional Transport and Urban Contributions to Fine Particle Concentrations in Southeastern Canada, 855
Sampling Frequency Guidance for Ambient Air Toxics Monitoring, 867
Numerical Evaluation of the Effect of Traffic Pollution on Indoor Air Quality of a Naturally Ventilated Building, 1043
Evaluation of Artificial Neural Networks for Fine Particulate Pollution (PM_{10} and $PM_{2.5}$) Forecasting, 1096
Levels and Composition of Atmospheric Particulates (PM_{10}) in a Mining–Industrial Site in the City of Lavrion, Greece, 1263
Survey of Waste Comminglers' VOC Exposures, 1298
Hg Reactions in the Presence of Chlorine Species: Homogeneous Gas Phase and Heterogeneous Gas-Solid Phase, 1316
Trends and Variability of Ground-Level O_3 in Connecticut over the Period 1981–1997, 1354
Controlling Air Pollution from Passenger Ferries: Cost-Effectiveness of Seven Technological Options, 1399

Air Quality Forecasting
Evaluation of Artificial Neural Networks for Fine Particulate Pollution (PM_{10} and $PM_{2.5}$) Forecasting, 1096

Air Quality Index
Using Continuous $PM_{2.5}$ Monitoring Data to Report an Air Quality Index, 104

Air Quality Standards
Factors Affecting Heavy-Duty Diesel Vehicle Emissions, 84
Comparison of Fine Particles and the Relationship between Particle Variations and Meteorology at an Urban Site and a Remote Site in the Eastern United States, 573
Estimation of Ambient $PM_{2.5}$ Concentrations in Maryland and Verification by Measured Values, 1161

Air Quality Studies
Secondary Organic Aerosol Formation from the Irradiation of Simulated Automobile Exhaust, 259
Spatial Characteristics of Fine Particulate Matter: Identifying Representative Monitoring Locations in Seattle, Washington, 324
Comparison of Fine Particles and the Relationship between Particle Variations and Meteorology at an Urban Site and a Remote Site in the Eastern United States, 573
Defining the Photochemical Contribution to Particulate Matter in Urban Areas Using Time-Series Analysis, 593
Concentration and Size Distribution of Ultrafine Particles Near a Major Highway, 1032
Forecasting Peak Daily Ozone Levels–I. A Regression with Time Series Errors Model Having a Principal Component Trigger to Fit 1991 Ozone Levels, 1064
Just-Noticeable Differences in Atmospheric Haze, 1238

Air Quality Trends Report
Source Extraction Information from Air Quality Data Monitored in an Argentinean Steel Mill, 140

Air Toxics
Large-Volume Injection PTV-GC-MS Analysis of Polycyclic Aromatic Hydrocarbons in Air and Sediment Samples, 19
Modeling Assessment of Air Emission Flux of Mercury from Soils in Terrestrial Landscape Components: Model Tests and Sensitivities, 339
Diagnostic Study of Critical Circuits of the Kraft Pulp Production Process Considering the Environmental Aspects, 765
Regeneration of a Compost Biofilter Degrading High Loads of Ammonia by Addition of Gaseous Methanol, 796
Sampling Frequency Guidance for Ambient Air Toxics Monitoring, 867
A Mechanism for Mercury Oxidation in Coal-Derived Exhausts, 894
Assessing Sorbents for Mercury Control in Coal-Combustion Flue Gas, 902
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Full-Scale Evaluation of Mercury Control with Sorbent Injection and COHPAC at Alabama Power E.C. Gaston, 918
The Catalytic Incineration of Styrene over an Mn_2O_3/Fe_2O_3 Catalyst, 1153
Decomposition of SF_6 in an RF Plasma Environment, 1274
Pore Structure Effects on Ca-Based Sorbent Sulfation Capacity at Medium Temperatures: Activated Carbon as Sorbent/Catalyst Support, 1281
Long-Term Operation of a Biofilter for Simultaneous Removal of H_2S and NH_3, 1389

Alternative/Innovative Technology
Controlling Air Pollution from Passenger Ferries: Cost-Effectiveness of Seven Technological Options, 1399

Ambient Air
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3
Real-Time Indoor and Outdoor Measurements of Black Carbon in an Occupied House: An Examination of Sources, 41
Levels and Characteristic Homologue Patterns of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in Various Incinerator Emissions and in Air Collected Near an Incinerator, 69
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Spatial Characteristics of Fine Particulate Matter: Identifying Representative Monitoring Locations in Seattle, Washington, 324
Sampling Frequency Guidance for Ambient Air Toxics Monitoring, 867
Concentration and Size Distribution of Ultrafine Particles Near a Major Highway, 1032
Identification of Sources Contributing to Mid-Atlantic Regional Aerosol, 1186

Ambient Air Quality Standards
Design of a Cost-Effective Weighing Facility for $PM_{2.5}$ Quality Assurance, 506

Ambient Concentrations
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3
An Examination of the 6:00 a.m.–9:00 a.m. Measurements of Ozone Precursors in the New York City Metropolitan Area, 181
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Spatial Characteristics of Fine Particulate Matter: Identifying Representative Monitoring Locations in Seattle, Washington, 324
Preparing to Measure the Effects of the NO_x SIP Call—Methods for Ambient Air Monitoring of NO, NO_2, NO_y, and Individual NO_z Species, 542
Sources of Atmospheric Carbonaceous Particulate Matter in Pittsburgh, Pennsylvania, 732
An Evaluation of the UAM-V Predicted Concentrations of Carbon Monoxide and Reactive Nitrogen Compounds over the Eastern United States during Summer 1995, 1324

Ammonia
Regeneration of a Compost Biofilter Degrading High Loads of Ammonia by Addition of Gaseous Methanol, 796

Analytical Methods
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3
Large-Volume Injection PTV-GC-MS Analysis of Polycyclic Aromatic Hydrocarbons in Air and Sediment Samples, 19
Aerosol Laser Ablation Mass Spectrometry of Suspended Powders from PM Sources and Its Implications to Receptor Modeling, 27
Spatial Differences in Outdoor PM_{10} Mass and Aerosol Composition in Mexico City, 423
Preparing to Measure the Effects of the NO_x SIP Call—Methods for Ambient Air Monitoring of NO, NO_2, NO_y, and Individual NO_z Species, 542
Online Hourly Determination of 62 VOCs in Ambient Air: System Evaluation and Comparison with Another Two Analytical Techniques, 1176
An Evaluation of the Tapered Element Oscillating Microbalance Method for Measuring Diesel Particulate Emissions, 1362

APC Residues
Stabilization of APC Residues from Waste Incineration with Ferrous Sulfate on a Semi-Industrial Scale, 722

Area Sources
Source Extraction Information from Air Quality Data Monitored in an Argentinean Steel Mill, 140
On the Relationship between Acid Rain and Cloud Type, 334
Quantification of Variability and Uncertainty in Lawn and Garden Equipment NO_x and Total Hydrocarbon Emission Factors, 435
An Automatic Sampler for Measurement of Dust-Deposition Rates around Fugitive Sources, 789

Arsenic
Levels and Composition of Atmospheric Particulates (PM_{10}) in a Mining–Industrial Site in the City of Lavrion, Greece, 1263

Ash, Bottom
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912

Ash, Fly
Levels and Characteristic Homologue Patterns of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in Various Incinerator Emissions and in Air Collected Near an Incinerator, 69
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Full-Scale Evaluation of Mercury Control with Sorbent Injection and COHPAC at Alabama Power E.C. Gaston, 918
Control of Mercury Emissions from a Municipal Solid Waste Incinerator in Japan, 931

Atmospheric Chemistry
Secondary Organic Aerosol Formation from the Irradiation of Simulated Automobile Exhaust, 259
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297

On the Relationship between Acid Rain and Cloud Type, 334
Comparison of Fine Particles and the Relationship between Particle Variations and Meteorology at an Urban Site and a Remote Site in the Eastern United States, 573
Sources of Atmospheric Carbonaceous Particulate Matter in Pittsburgh, Pennsylvania, 732

Atmospheric Dispersion
An Atmospheric Dispersion Model for the Environmental Impact Assessment of Thermal Power Plants in Japan—A Method for Evaluating Topographical Effects, 313

Atmospheric Transparency
Just-Noticeable Differences in Atmospheric Haze, 1238

Automotive Exhaust
Factors Affecting Heavy-Duty Diesel Vehicle Emissions, 84
Hot Emission Model for Mobile Sources: Application to the Metropolitan Region of the City of Santiago, Chile, 167
Real-World Vehicle Emissions: A Summary of the Eleventh Coordinating Research Council On-Road Vehicle Emissions Workshop, 220
On-Road Facility to Measure and Characterize Emissions from Heavy-Duty Diesel Vehicles, 388
An Evaluation of the Tapered Element Oscillating Microbalance Method for Measuring Diesel Particulate Emissions, 1362

Average Downwind Distance
The Wind-Frequency Allocation Method on Discharge Loading of Function Zones, 714

Back Propagation
Prediction of Ambient PM_{10} and Toxic Metals Using Artificial Neural Networks, 805

Baghouses
The Utilization of Catalyst Sorbent in Scrubbing Acid Gases from Incineration Flue Gas, 449
Assessing Sorbents for Mercury Control in Coal-Combustion Flue Gas, 902
Full-Scale Evaluation of Mercury Control with Sorbent Injection and COHPAC at Alabama Power E.C. Gaston, 918
Control of Mercury Emissions from a Municipal Solid Waste Incinerator in Japan, 931

Bark
Use of Treated Bark for the Removal of Lipids from Water, 76

Batch Biofiltration
Effects of Nitrogen and Oxygen on Biofilter Performance, 279
Degradation Characteristics of Toluene, Benzene, Ethylbenzene, and Xylene by *Stenotrophomonas maltophilia* T3-c, 400
Regeneration of a Compost Biofilter Degrading High Loads of Ammonia by Addition of Gaseous Methanol, 796
Long-Term Operation of a Biofilter for Simultaneous Removal of H_2S and NH_3, 1389

Bayesian Statistics
Rapidly Locating and Characterizing Pollutant Releases in Buildings, 1422

Biodegradation
Degradation Characteristics of Toluene, Benzene, Ethylbenzene, and Xylene by *Stenotrophomonas maltophilia* T3-c, 400

Biofiltration
Development and Demonstration of an Explicit Lumped-Parameter Biofilter Model and Design Equation Incorporating Monod Kinetics, 208
Effects of Nitrogen and Oxygen on Biofilter Performance, 279
1-Butanol Removal from a Contaminated Airstream under Continuous and Diurnal Loading Conditions, 1288

Bioleaching
Effects of Solids Concentration on Bacterial Leaching of Heavy Metals from Sewage Sludge, 237

Bioremediation
Volatile Hydrocarbon Emissions from a Diesel Fuel-Contaminated Soil Bioremediation Facility, 769

Black Carbon
Particle Size Relationships at the Fresno Supersite, 822

BTEX
Catalytic Oxidation of Organic Compounds in Incineration Flue Gas by a Commercial Palladium Catalyst, 198
Degradation Characteristics of Toluene, Benzene, Ethylbenzene, and Xylene by *Stenotrophomonas maltophilia* T3-c, 400

Buildings
Numerical Evaluation of the Effect of Traffic Pollution on Indoor Air Quality of a Naturally Ventilated Building, 1043

Calculation Methods
Hot Emission Model for Mobile Sources: Application to the Metropolitan Region of the City of Santiago, Chile, 167
Prediction of Pressure Drop in an Orifice Scrubber Based on a Lagrangian Approach, 308
An Atmospheric Dispersion Model for the Environmental Impact Assessment of Thermal Power Plants in Japan—A Method for Evaluating Topographical Effects, 313
A Method for Predicting the Performance of Packed Columns Operating with a Reactive Scrubbing Liquid That Control Gaseous Air Pollutants, 396
Quantification of Variability and Uncertainty in Lawn and Garden Equipment NO_x and Total Hydrocarbon Emission Factors, 435
Development of Emission Factors for Polycarbonate Processing, 781
Establishing the Propensity for Dioxin Formation Using a Plume Temperature Model for Medical Waste Incinerator Emissions in Developing Countries, 811

Calibration
Online Hourly Determination of 62 VOCs in Ambient Air: System Evaluation and Comparison with Another Two Analytical Techniques, 1176
Observations on the Suitability of the Aethalometer for Vehicular and Workplace Monitoring, 1258

Carbon Dioxide
Hot Emission Model for Mobile Sources: Application to the Metropolitan Region of the City of Santiago, Chile, 167
On-Road Facility to Measure and Characterize Emissions from Heavy-Duty Diesel Vehicles, 388
Surface Flux Measurements of CO_2 and N_2O from a Dried Rice Paddy in Japan during a Fallow Winter Season, 416
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521

Carbon Fractions
Evaluation of OC/EC Speciation by Thermal Manganese Dioxide Oxidation and the IMPROVE Method, 1333

Carbon Monoxide
On-Road Facility to Measure and Characterize Emissions from Heavy-Duty Diesel Vehicles, 388
Meta-Analysis of Time-Series Studies of Air Pollution and Mortality: Effects of Gases and Particles and the Influence of Cause of Death, Age, and Season, 470
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
A Reevaluation of Carbon Monoxide: Past Trends, Future Concentrations, and Implications for Conformity "Hot-Spot" Policies, 1012
Concentration and Size Distribution of Ultrafine Particles Near a Major Highway, 1032
An Evaluation of the UAM-V Predicted Concentrations of Carbon Monoxide and Reactive Nitrogen Compounds over the Eastern United States during Summer 1995, 1324

Carbon Sequestration
Modeling and Spatially Distributing Forest Net Primary Production at the Regional Scale, 407

Catalyst
Effect of NO_x Control Processes on Mercury Speciation in Utility Flue Gas, 941

Catalytic Conversion
The Utilization of Catalyst Sorbent in Scrubbing Acid Gases from Incineration Flue Gas, 449
Photocatalytic Oxidation of Volatile Organic Compounds Using Fluorescent Visible Light, 845
The Catalytic Incineration of Styrene over an Mn_2O_3/Fe_2O_3 Catalyst, 1153
Pore Structure Effects on Ca-Based Sorbent Sulfation Capacity at Medium Temperatures: Activated Carbon as Sorbent/Catalyst Support, 1281

Catalytic Incineration
Catalytic Oxidation of Organic Compounds in Incineration Flue Gas by a Commercial Palladium Catalyst, 198

Celite
Development and Demonstration of an Explicit Lumped-Parameter Biofilter Model and Design Equation Incorporating Monod Kinetics, 208

Ceramic Filters
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521

Characterization
Levels and Characteristic Homologue Patterns of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in Various Incinerator Emissions and in Air Collected Near an Incinerator, 69
Determination of Atmospheric Nitrogen Input to Lake Greenwood, South Carolina—I. PM Measurements, 1411

Chlorine Dioxide
Wet Scrubber Analysis of Volatile Organic Compound Removal in the Rendering Industry, 459

Clean Air Act Amendments
Development of Emission Factors for Polycarbonate Processing, 781

Climate Change
The Impact of Municipal Solid Waste Management on Greenhouse Gas Emissions in the United States, 1000

Coal-Burning Facilities
Modeling the Benefits of Power Plant Emission Controls in Massachusetts, 5
A Mechanism for Mercury Oxidation in Coal-Derived Exhausts, 894
Assessing Sorbents for Mercury Control in Coal-Combustion Flue Gas, 902
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Hg Reactions in the Presence of Chlorine Species: Homogeneous Gas Phase and Heterogeneous Gas-Solid Phase, 1316

Coal Combustion Byproducts (CCBs)
Release of Mercury Vapor from Coal Combustion Ash, 927

Collection
Shortest Service Location Model for Planning Waste Pickup Locations, 585

Color Perception
Just-Noticeable Differences in Atmospheric Haze, 1238

Combined Pollutant Removal Technologies
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521

Combustion
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3
Combined Simulation of Combustion and Gas Flow in a Grate-Type Incinerator, 189
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Release of Mercury Vapor from Coal Combustion Ash, 927
The Impact of Municipal Solid Waste Management on Greenhouse Gas Emissions in the United States, 1000
Quantification of Variability and Uncertainty in Air Pollutant Emission Inventories: Method and Case Study for Utility NO_x Emissions, 1083
Pore Structure Effects on Ca-Based Sorbent Sulfation Capacity at Medium Temperatures: Activated Carbon as Sorbent/Catalyst Support, 1281
Hg Reactions in the Presence of Chlorine Species: Homogeneous Gas Phase and Heterogeneous Gas-Solid Phase, 1316

Compliance
An Automatic Sampler for Measurement of Dust-Deposition Rates around Fugitive Sources, 789
Estimation of Ambient $PM_{2.5}$ Concentrations in Maryland and Verification by Measured Values, 1161

Computational Fluid Dynamics
Combined Simulation of Combustion and Gas Flow in a Grate-Type Incinerator, 189

Concentration Measurement
Quantitative Analysis of Environmental Factors in Differential Weighing of Blank Teflon Filters, 134

Conformity
A Reevaluation of Carbon Monoxide: Past Trends, Future Concentrations, and Implications for Conformity "Hot-Spot" Policies, 1012

Contaminated Soil
Volatile Hydrocarbon Emissions from a Diesel Fuel-Contaminated Soil Bioremediation Facility, 769
A Novel Design for Anaerobic Chemical Oxygen Demand and Nitrogen Removal from Leachate in a Semi-aerobic Landfill, 1139

Continuous Emission Monitoring
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Particle Size Relationships at the Fresno Supersite, 822

Continuous Measurements
Particle Size Relationships at the Fresno Supersite, 822

Control Strategies
Modeling the Benefits of Power Plant Emission Controls in Massachusetts, 5
The Utilization of Catalyst Sorbent in Scrubbing Acid Gases from Incineration Flue Gas, 449
Defining the Photochemical Contribution to Particulate Matter in Urban Areas Using Time-Series Analysis, 593
Diagnostic Study of Critical Circuits of the Kraft Pulp Production Process Considering the Environmental Aspects, 765
Establishing the Propensity for Dioxin Formation Using a Plume Temperature Model for Medical Waste Incinerator Emissions in Developing Countries, 811
Microfibrous Mesh Coated with Titanium Dioxide: A Self-Sterilizing, Self-Cleaning Filter, 1206
Pore Structure Effects on Ca-Based Sorbent Sulfation Capacity at Medium Temperatures: Activated Carbon as Sorbent/Catalyst Support, 1281

Control Technologies
The Utilization of Catalyst Sorbent in Scrubbing Acid Gases from Incineration Flue Gas, 449
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
Diagnostic Study of Critical Circuits of the Kraft Pulp Production Process Considering the Environmental Aspects, 765
Regeneration of a Compost Biofilter Degrading High Loads of Ammonia by Addition of Gaseous Methanol, 796
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Control of Mercury Emissions from a Municipal Solid Waste Incinerator in Japan, 931
Quantification of Variability and Uncertainty in Air Pollutant Emission Inventories: Method and Case Study for Utility NO_x Emissions, 1083
The Catalytic Incineration of Styrene over an Mn_2O_3/Fe_2O_3 Catalyst, 1153
Microfibrous Mesh Coated with Titanium Dioxide: A Self-Sterilizing, Self-Cleaning Filter, 1206
Pore Structure Effects on Ca-Based Sorbent Sulfation Capacity at Medium Temperatures: Activated Carbon as Sorbent/Catalyst Support, 1281
Hg Reactions in the Presence of Chlorine Species: Homogeneous Gas Phase and Heterogeneous Gas-Solid Phase, 1316

Costs
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
Shortest Service Location Model for Planning Waste Pickup Locations, 585

Critical Review
2002 Critical Review—Visibility: Science and Regulation, 626
2002 Critical Review Discussion—Visibility: Science and Regulation, 973

Databases
Quantification of Variability and Uncertainty in Air Pollutant Emission Inventories: Method and Case Study for Utility NO_x Emissions, 1083

Data Collection
Sampling Frequency Guidance for Ambient Air Toxics Monitoring, 867

Data Interpretation
Rapidly Locating and Characterizing Pollutant Releases in Buildings, 1422

Data Quality
Using Continuous $PM_{2.5}$ Monitoring Data to Report an Air Quality Index, 104
Quantitative Analysis of Environmental Factors in Differential Weighing of Blank Teflon Filters, 134
Quantification of Variability and Uncertainty in Lawn and Garden Equipment NO_x and Total Hydrocarbon Emission Factors, 435
Sampling Frequency Guidance for Ambient Air Toxics Monitoring, 867
Quantification of Variability and Uncertainty in Air Pollutant Emission Inventories: Method and Case Study for Utility NO_x Emissions, 1083
Online Hourly Determination of 62 VOCs in Ambient Air: System Evaluation and Comparison with Another Two Analytical Techniques, 1176

Deactivation
Catalytic Oxidation of Organic Compounds in Incineration Flue Gas by a Commercial Palladium Catalyst, 198

Decision-Making
Using Continuous $PM_{2.5}$ Monitoring Data to Report an Air Quality Index, 104
Source Extraction Information from Air Quality Data Monitored in an Argentinean Steel Mill, 140
Estimation of Ambient $PM_{2.5}$ Concentrations in Maryland and Verification by Measured Values, 1161

Deep Biofilm
Development and Demonstration of an Explicit Lumped-Parameter Biofilter Model and Design Equation Incorporating Monod Kinetics, 208

Deposition
Determination of Atmospheric Nitrogen Input to Lake Greenwood, South Carolina—I. PM Measurements, 1411

Design
Development and Demonstration of an Explicit Lumped-Parameter Biofilter Model and Design Equation Incorporating Monod Kinetics, 208

Destruction and Removal Efficiencies
Wet Scrubber Analysis of Volatile Organic Compound Removal in the Rendering Industry, 459
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Microfibrous Mesh Coated with Titanium Dioxide: A Self-Sterilizing, Self-Cleaning Filter, 1206

Developing Countries
Establishing the Propensity for Dioxin Formation Using a Plume Temperature Model for Medical Waste Incinerator Emissions in Developing Countries, 811

Diesel Exhaust
Observations on the Suitability of the Aethalometer for Vehicular and Workplace Monitoring, 1258

Diesel Particulate
An Evaluation of the Tapered Element Oscillating Microbalance Method for Measuring Diesel Particulate Emissions, 1362

Dioxin-Contaminated Material
Levels and Characteristic Homologue Patterns of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in Various Incinerator Emissions and in Air Collected Near an Incinerator, 69

Dioxin Formation
Levels and Characteristic Homologue Patterns of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in Various Incinerator Emissions and in Air Collected Near an Incinerator, 69
Establishing the Propensity for Dioxin Formation Using a Plume Temperature Model for Medical Waste Incinerator Emissions in Developing Countries, 811

Dispersion Models
Modeling the Benefits of Power Plant Emission Controls in Massachusetts, 5
Air Intake Contamination by Building Exhausts: Tracer Gas Investigation of Atmospheric Dispersion Models in the Urban Environment, 160
Prediction of Pressure Drop in an Orifice Scrubber Based on a Lagrangian Approach, 308
An Atmospheric Dispersion Model for the Environmental Impact Assessment of Thermal Power Plants in Japan—A Method for Evaluating Topographical Effects, 313
Methodology for Siting Ambient Air Monitors at the Neighborhood Scale, 1433

Dredging
Volatilization of Contaminants from Suspended Sediment in a Water Column during Dredging, 1214

Droplet Charging
Spray Charging of Droplets in a Wet Scrubber, 175

Dust Deposition
An Automatic Sampler for Measurement of Dust-Deposition Rates around Fugitive Sources, 789

Dust, Fugitive
An Automatic Sampler for Measurement of Dust-Deposition Rates around Fugitive Sources, 789

Economics
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
Controlling Air Pollution from Passenger Ferries: Cost-Effectiveness of Seven Technological Options, 1399

Electric Utilities
An Atmospheric Dispersion Model for the Environmental Impact Assessment of Thermal Power Plants in Japan—A Method for Evaluating Topographical Effects, 313
A Mechanism for Mercury Oxidation in Coal-Derived Exhausts, 894

Electrostatic Precipitation
Spray Charging of Droplets in a Wet Scrubber, 175
Assessing Sorbents for Mercury Control in Coal-Combustion Flue Gas, 902
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Full-Scale Evaluation of Mercury Control with Sorbent Injection and COHPAC at Alabama Power E.C. Gaston, 918
Electrostatic Precipitation of Ultrafine Particles Enhanced by Simultaneous Diffusional Deposition on Wire Screens, 1342

Emission Controls
Simultaneous Control of Hg^0, SO_2, and NO_x by Novel Oxidized Calcium-Based Sorbents, 273
Effects of Nitrogen and Oxygen on Biofilter Performance, 279
The Utilization of Catalyst Sorbent in Scrubbing Acid Gases from Incineration Flue Gas, 449
Wet Scrubber Analysis of Volatile Organic Compound Removal in the Rendering Industry, 459
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
Assessing Sorbents for Mercury Control in Coal-Combustion Flue Gas, 902
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Full-Scale Evaluation of Mercury Control with Sorbent Injection and COHPAC at Alabama Power E.C. Gaston, 918
Control of Mercury Emissions from a Municipal Solid Waste Incinerator in Japan, 931
The Effect of Repairs on Tailpipe Emissions for On-Board Diagnostics II-Equipped Vehicles with the Malfunction Indicator Light Illuminated, 1054
Quantification of Variability and Uncertainty in Air Pollutant Emission Inventories: Method and Case Study for Utility NO_x Emissions, 1083
Decomposition of SF_6 in an RF Plasma Environment, 1274
Hg Reactions in the Presence of Chlorine Species: Homogeneous Gas Phase and Heterogeneous Gas-Solid Phase, 1316
Trends and Variability of Ground-Level O_3 in Connecticut over the Period 1981–1997, 1354
Long-Term Operation of a Biofilter for Simultaneous Removal of H_2S and NH_3, 1389
Controlling Air Pollution from Passenger Ferries: Cost-Effectiveness of Seven Technological Options, 1399

Emission Factors
Development of Emission Factors for Polycarbonate Processing, 781

Emission Inventories
Hot Emission Model for Mobile Sources: Application to the Metropolitan Region of the City of Santiago, Chile, 167
Real-World Vehicle Emissions: A Summary of the Eleventh Coordinating Research Council On-Road Vehicle Emissions Workshop, 220
Spatial Characteristics of Fine Particulate Matter: Identifying Representative Monitoring Locations in Seattle, Washington, 324
Surface Flux Measurements of CO_2 and N_2O from a Dried Rice Paddy in Japan during a Fallow Winter Season, 416
Sources of Atmospheric Carbonaceous Particulate Matter in Pittsburgh, Pennsylvania, 732
The Effect of Repairs on Tailpipe Emissions for On-Board Diagnostics II-Equipped Vehicles with the Malfunction Indicator Light Illuminated, 1054
Quantification of Variability and Uncertainty in Air Pollutant Emission Inventories: Method and Case Study for Utility NO_x Emissions, 1083

Emission Rates
Real-World Vehicle Emissions: A Summary of the Eleventh Coordinating Research Council On-Road Vehicle Emissions Workshop, 220
On-Road Facility to Measure and Characterize Emissions from Heavy-Duty Diesel Vehicles, 388
Quantification of Variability and Uncertainty in Lawn and Garden Equipment NO_x and Total Hydrocarbon Emission Factors, 435
Volatile Hydrocarbon Emissions from a Diesel Fuel-Contaminated Soil Bioremediation Facility, 769
The Effect of Repairs on Tailpipe Emissions for On-Board Diagnostics II-Equipped Vehicles with the Malfunction Indicator Light Illuminated, 1054
Quantification of Variability and Uncertainty in Air Pollutant Emission Inventories: Method and Case Study for Utility NO_x Emissions, 1083

Emission Standards
Establishing the Propensity for Dioxin Formation Using a Plume Temperature Model for Medical Waste Incinerator Emissions in Developing Countries, 811

Emissions
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3
Factors Affecting Heavy-Duty Diesel Vehicle Emissions, 84
Real-World Vehicle Emissions: A Summary of the Eleventh Coordinating Research Council On-Road Vehicle Emissions Workshop, 220
Modeling Assessment of Air Emission Flux of Mercury from Soils in Terrestrial Landscape Components: Model Tests and Sensitivities, 339
Quantification of Variability and Uncertainty in Lawn and Garden Equipment NO_x and Total Hydrocarbon Emission Factors, 435
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
The Wind-Frequency Allocation Method on Discharge Loading of Function Zones, 714
Development of Emission Factors for Polycarbonate Processing, 781
A Mechanism for Mercury Oxidation in Coal-Derived Exhausts, 894
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Quantification of Variability and Uncertainty in Air Pollutant Emission Inventories: Method and Case Study for Utility NO_x Emissions, 1083
Volatilization of Contaminants from Suspended Sediment in a Water Column during Dredging, 1214
Survey of Waste Comminglers' VOC Exposures, 1298
Controlling Air Pollution from Passenger Ferries: Cost-Effectiveness of Seven Technological Options, 1399

Emissions, Automotive
Real-Time Indoor and Outdoor Measurements of Black Carbon in an Occupied House: An Examination of Sources, 41
Factors Affecting Heavy-Duty Diesel Vehicle Emissions, 84
Hot Emission Model for Mobile Sources: Application to the Metropolitan Region of the City of Santiago, Chile, 167
Secondary Organic Aerosol Formation from the Irradiation of Simulated Automobile Exhaust, 259
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Measurement and Three-Dimensional Modeling of Airflow and Pollutant Dispersion in an Undersea Traffic Tunnel, 349
On-Road Facility to Measure and Characterize Emissions from Heavy-Duty Diesel Vehicles, 388
A Reevaluation of Carbon Monoxide: Past Trends, Future Concentrations, and Implications for Conformity "Hot-Spot" Policies, 1012
Effects of Engine Speed and Accessory Load on Idling Emissions from Heavy-Duty Diesel Truck Engines, 1026
The Effect of Repairs on Tailpipe Emissions for On-Board Diagnostics II-Equipped Vehicles with the Malfunction Indicator Light Illuminated, 1054
Observations on the Suitability of the Aethalometer for Vehicular and Workplace Monitoring, 1258
An Evaluation of the Tapered Element Oscillating Microbalance Method for Measuring Diesel Particulate Emissions, 1362

Emissions, Carbon Monoxide
A Reevaluation of Carbon Monoxide: Past Trends, Future Concentrations, and Implications for Conformity "Hot-Spot" Policies, 1012

Emissions Characterization
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3
Levels and Characteristic Homologue Patterns of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in Various Incinerator Emissions and in Air Collected Near an Incinerator, 69
Source Extraction Information from Air Quality Data Monitored in an Argentinean Steel Mill, 140
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Spatial Differences in Outdoor PM_{10} Mass and Aerosol Composition in Mexico City, 423
Diagnostic Study of Critical Circuits of the Kraft Pulp Production Process Considering the Environmental Aspects, 765
Volatile Hydrocarbon Emissions from a Diesel Fuel-Contaminated Soil Bioremediation Facility, 769
Effects of Engine Speed and Accessory Load on Idling Emissions from Heavy-Duty Diesel Truck Engines, 1026
Survey of Waste Comminglers' VOC Exposures, 1298
An Evaluation of the Tapered Element Oscillating Microbalance Method for Measuring Diesel Particulate Emissions, 1362

Emissions, Fugitive
An Automatic Sampler for Measurement of Dust-Deposition Rates around Fugitive Sources, 789

Emissions, Hydrocarbon
Quantification of Variability and Uncertainty in Lawn and Garden Equipment NO_x and Total Hydrocarbon Emission Factors, 435
Volatile Hydrocarbon Emissions from a Diesel Fuel-Contaminated Soil Bioremediation Facility, 769

Emissions, Natural
Modeling Assessment of Air Emission Flux of Mercury from Soils in Terrestrial Landscape Components: Model Tests and Sensitivities, 339
Surface Flux Measurements of CO_2 and N_2O from a Dried Rice Paddy in Japan during a Fallow Winter Season, 416
Long-Term Operation of a Biofilter for Simultaneous Removal of H_2S and NH_3, 1389

Emissions Reduction
Modeling the Benefits of Power Plant Emission Controls in Massachusetts, 5
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
Diagnostic Study of Critical Circuits of the Kraft Pulp Production Process Considering the Environmental Aspects, 765
Establishing the Propensity for Dioxin Formation Using a Plume Temperature Model for Medical Waste Incinerator Emissions in Developing Countries, 811
Long-Term Operation of a Biofilter for Simultaneous Removal of H_2S and NH_3, 1389
Controlling Air Pollution from Passenger Ferries: Cost-Effectiveness of Seven Technological Options, 1399

Entrained-Phase
Removal of PCDD/F from Incinerator Flue Gases by Entrained-Phase Adsorption, 1378

Environmental Capacity
The Wind-Frequency Allocation Method on Discharge Loading of Function Zones, 714

Environmental Impact Assessment
An Atmospheric Dispersion Model for the Environmental Impact Assessment of Thermal Power Plants in Japan—A Method for Evaluating Topographical Effects, 313

Environmental Management
Degradation Characteristics of Toluene, Benzene, Ethylbenzene, and Xylene by *Stenotrophomonas maltophilia* T3-c, 400
A Reevaluation of Carbon Monoxide: Past Trends, Future Concentrations, and Implications for Conformity "Hot-Spot" Policies, 1012
A Novel Design for Anaerobic Chemical Oxygen Demand and Nitrogen Removal from Leachate in a Semi-aerobic Landfill, 1139

Environmental Protection
Regeneration of a Compost Biofilter Degrading High Loads of Ammonia by Addition of Gaseous Methanol, 796
Evaluation of Artificial Neural Networks for Fine Particulate Pollution (PM_{10} and $PM_{2.5}$) Forecasting, 1096
Pore Structure Effects on Ca-Based Sorbent Sulfation Capacity at Medium Temperatures: Activated Carbon as Sorbent/Catalyst Support, 1281

Epidemiology
Meta-Analysis of Time-Series Studies of Air Pollution and Mortality: Effects of Gases and Particles and the Influence of Cause of Death, Age, and Season, 470

Exposure Parameters
Real-Time Indoor and Outdoor Measurements of Black Carbon in an Occupied House: An Examination of Sources, 41
Survey of Waste Comminglers' VOC Exposures, 1298

Extrusion
Development of Emission Factors for Polycarbonate Processing, 781

Fabric Filters
Full-Scale Evaluation of Mercury Control with Sorbent Injection and COHPAC at Alabama Power E.C. Gaston, 918

Facility Siting
Shortest Service Location Model for Planning Waste Pickup Locations, 585

Feed Forward Network
Prediction of Ambient PM_{10} and Toxic Metals Using Artificial Neural Networks, 805

Ferrous Sulfate
Stabilization of APC Residues from Waste Incineration with Ferrous Sulfate on a Semi-Industrial Scale, 722

Flue Gases
Levels and Characteristic Homologue Patterns of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in Various Incinerator Emissions and in Air Collected Near an Incinerator, 69
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
Establishing the Propensity for Dioxin Formation Using a Plume Temperature Model for Medical Waste Incinerator Emissions in Developing Countries, 811
A Mechanism for Mercury Oxidation in Coal-Derived Exhausts, 894
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Effect of NO_x Control Processes on Mercury Speciation in Utility Flue Gas, 941
Pore Structure Effects on Ca-Based Sorbent Sulfation Capacity at Medium Temperatures: Activated Carbon as Sorbent/Catalyst Support, 1281

Flux Chamber Measurements
Surface Flux Measurements of CO_2 and N_2O from a Dried Rice Paddy in Japan during a Fallow Winter Season, 416

Fly Ash
Stabilization of APC Residues from Waste Incineration with Ferrous Sulfate on a Semi-Industrial Scale, 722

Forecasting
Forecasting Peak Daily Ozone Levels–I. A Regression with Time Series Errors Model Having a Principal Component Trigger to Fit 1991 Ozone Levels, 1064

Forest Carbon
Modeling and Spatially Distributing Forest Net Primary Production at the Regional Scale, 407

Forests
Modeling and Spatially Distributing Forest Net Primary Production at the Regional Scale, 407

Fuels
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912

Fuels, Alternative
Controlling Air Pollution from Passenger Ferries: Cost-Effectiveness of Seven Technological Options, 1399

Fuels, Fossil
Full-Scale Evaluation of Mercury Control with Sorbent Injection and COHPAC at Alabama Power E.C. Gaston, 918

Gas Chromatography
Levels and Characteristic Homologue Patterns of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in Various Incinerator Emissions and in Air Collected Near an Incinerator, 69
Degradation Characteristics of Toluene, Benzene, Ethylbenzene, and Xylene by *Stenotrophomonas maltophilia* T3-c, 400
Online Hourly Determination of 62 VOCs in Ambient Air: System Evaluation and Comparison with Another Two Analytical Techniques, 1176

Gas Chromatography/ Mass Spectrometry
Large-Volume Injection PTV-GC-MS Analysis of Polycyclic Aromatic Hydrocarbons in Air and Sediment Samples, 19
Wet Scrubber Analysis of Volatile Organic Compound Removal in the Rendering Industry, 459

Gases, Greenhouse
Surface Flux Measurements of CO_2 and N_2O from a Dried Rice Paddy in Japan during a Fallow Winter Season, 416
The Impact of Municipal Solid Waste Management on Greenhouse Gas Emissions in the United States, 1000

Gasoline
Secondary Organic Aerosol Formation from the Irradiation of Simulated Automobile Exhaust, 259
Spatial Differences in Outdoor PM_{10} Mass and Aerosol Composition in Mexico City, 423
Contribution of the Gasoline Distribution Cycle to Volatile Organic Compound Emissions in the Metropolitan Area of Mexico City, 535

Gasoline Distribution
Contribution of the Gasoline Distribution Cycle to Volatile Organic Compound Emissions in the Metropolitan Area of Mexico City, 535

Global Pollution
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912

Global Warming/ Greenhouse Effect
Modeling and Spatially Distributing Forest Net Primary Production at the Regional Scale, 407
Surface Flux Measurements of CO_2 and N_2O from a Dried Rice Paddy in Japan during a Fallow Winter Season, 416
The Impact of Municipal Solid Waste Management on Greenhouse Gas Emissions in the United States, 1000
Decomposition of SF_6 in an RF Plasma Environment, 1274

Gravimetry
Quantitative Analysis of Environmental Factors in Differential Weighing of Blank Teflon Filters, 134

Hazardous Air Pollutants
Prediction of Pressure Drop in an Orifice Scrubber Based on a Lagrangian Approach, 308
The Utilization of Catalyst Sorbent in Scrubbing Acid Gases from Incineration Flue Gas, 449
Regeneration of a Compost Biofilter Degrading High Loads of Ammonia by Addition of Gaseous Methanol, 796
Sampling Frequency Guidance for Ambient Air Toxics Monitoring, 867
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
The Catalytic Incineration of Styrene over an Mn_2O_3/Fe_2O_3 Catalyst, 1153
Decomposition of SF_6 in an RF Plasma Environment, 1274
Pore Structure Effects on Ca-Based Sorbent Sulfation Capacity at Medium Temperatures: Activated Carbon as Sorbent/Catalyst Support, 1281

Hazardous Waste
Survey of Waste Comminglers' VOC Exposures, 1298

Hazardous Waste Cleanup
Slurry-Phase Ozonation for Remediation of Sediments Contaminated by Polycyclic Aromatic Hydrocarbons, 58
Effects of Solids Concentration on Bacterial Leaching of Heavy Metals from Sewage Sludge, 237
Degradation Characteristics of Toluene, Benzene, Ethylbenzene, and Xylene by *Stenotrophomonas maltophilia* T3-c, 400

Hazardous Waste Sites
Volatilization of Contaminants from Suspended Sediment in a Water Column during Dredging, 1214

Haze
Just-Noticeable Differences in Atmospheric Haze, 1238

Health Effects/Risks
Modeling the Benefits of Power Plant Emission Controls in Massachusetts, 5
Air Intake Contamination by Building Exhausts: Tracer Gas Investigation of Atmospheric Dispersion Models in the Urban Environment, 160
Spatial Differences in Outdoor PM_{10} Mass and Aerosol Composition in Mexico City, 423
Meta-Analysis of Time-Series Studies of Air Pollution and Mortality: Effects of Gases and Particles and the Influence of Cause of Death, Age, and Season, 470

Heavy-Duty Diesel Emissions
Real-World Vehicle Emissions: A Summary of the Eleventh Coordinating Research Council On-Road Vehicle Emissions Workshop, 220

Heavy Metals
Effects of Solids Concentration on Bacterial Leaching of Heavy Metals from Sewage Sludge, 237

Human Exposure
Real-Time Indoor and Outdoor Measurements of Black Carbon in an Occupied House: An Examination of Sources, 41
Quantitative Analysis of Environmental Factors in Differential Weighing of Blank Teflon Filters, 134
The Effect of Opening Windows on Air Change Rates in Two Homes, 147
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Spatial Differences in Outdoor PM_{10} Mass and Aerosol Composition in Mexico City, 423
Volatile Hydrocarbon Emissions from a Diesel Fuel-Contaminated Soil Bioremediation Facility, 769
Continuous Monitoring of Ultrafine, Fine, and Coarse Particles in a Residence for 18 Months in 1999–2000, 828
Development and Laboratory Performance Evaluation of a Personal Cascade Impactor, 1230

Hydrocarbons
Hot Emission Model for Mobile Sources: Application to the Metropolitan Region of the City of Santiago, Chile, 167
An Examination of the 6:00 a.m.–9:00 a.m. Measurements of Ozone Precursors in the New York City Metropolitan Area, 181
On-Road Facility to Measure and Characterize Emissions from Heavy-Duty Diesel Vehicles, 388
Quantification of Variability and Uncertainty in Lawn and Garden Equipment NO_x and Total Hydrocarbon Emission Factors, 435

Idling
Effects of Engine Speed and Accessory Load on Idling Emissions from Heavy-Duty Diesel Truck Engines, 1026

IMPROVE Protocol
Comparison of Fine Particles and the Relationship between Particle Variations and Meteorology at an Urban Site and a Remote Site in the Eastern United States, 573
Evaluation of OC/EC Speciation by Thermal Manganese Dioxide Oxidation and the IMPROVE Method, 1333

Incineration
Combined Simulation of Combustion and Gas Flow in a Grate-Type Incinerator, 189
Catalytic Oxidation of Organic Compounds in Incineratoin Flue Gas by a Commercial Palladium Catalyst, 198
The Utilization of Catalyst Sorbent in Scrubbing Acid Gases from Incineration Flue Gas, 449
Stabilization of APC Residues from Waste Incineration with Ferrous Sulfate on a Semi-Industrial Scale, 722
Establishing the Propensity for Dioxin Formation Using a Plume Temperature Model for Medical Waste Incinerator Emissions in Developing Countries, 811
Control of Mercury Emissions from a Municipal Solid Waste Incinerator in Japan, 931
The Impact of Municipal Solid Waste Management on Greenhouse Gas Emissions in the United States, 1000
Pore Structure Effects on Ca-Based Sorbent Sulfation Capacity at Medium Temperatures: Activated Carbon as Sorbent/Catalyst Support, 1281

Individual Exposure
Real-Time Indoor and Outdoor Measurements of Black Carbon in an Occupied House: An Examination of Sources, 41
Survey of Waste Comminglers' VOC Exposures, 1298

Indoor Air Modeling
Rapidly Locating and Characterizing Pollutant Releases in Buildings, 1422

Indoor Air Pollution
Real-Time Indoor and Outdoor Measurements of Black Carbon in an Occupied House: An Examination of Sources, 41
The Effect of Opening Windows on Air Change Rates in Two Homes, 147
Continuous Monitoring of Ultrafine, Fine, and Coarse Particles in a Residence for 18 Months in 1999–2000, 828
Numerical Evaluation of the Effect of Traffic Pollution on Indoor Air Quality of a Naturally Ventilated Building, 1043
Microfibrous Mesh Coated with Titanium Dioxide: A Self-Sterilizing, Self-Cleaning Filter, 1206
Development and Laboratory Performance Evaluation of a Personal Cascade Impactor, 1230
Rapidly Locating and Characterizing Pollutant Releases in Buildings, 1422

Indoor Air Quality
Numerical Evaluation of the Effect of Traffic Pollution on Indoor Air Quality of a Naturally Ventilated Building, 1043

Industrial Pollution
Use of Treated Bark for the Removal of Lipids from Water, 76
Source Extraction Information from Air Quality Data Monitored in an Argentinean Steel Mill, 140
Respirable Particulate Matter at an Urban and Nearby Industrial Location: Concentrations and Variability and Synoptic Weather Conditions during High Pollution Episodes, 287
On the Relationship between Acid Rain and Cloud Type, 334
The Catalytic Incineration of Styrene over an Mn_2O_3/Fe_2O_3 Catalyst, 1153
An Evaluation of the UAM-V Predicted Concentrations of Carbon Monoxide and Reactive Nitrogen Compounds over the Eastern United States during Summer 1995, 1324

Infiltration
The Effect of Opening Windows on Air Change Rates in Two Homes, 147

Innovative Technologies
Microfibrous Mesh Coated with Titanium Dioxide: A Self-Sterilizing, Self-Cleaning Filter, 1206
1-Butanol Removal from a Contaminated Airstream under Continuous and Diurnal Loading Conditions, 1288

Inspection/Maintenance
Real-World Vehicle Emissions: A Summary of the Eleventh Coordinating Research Council On-Road Vehicle Emissions Workshop, 220

Ion-Exchange
Lead Removal from Synthetic Leachate Matrices by a Novel Ion-Exchange Material, 1075

Kinetics
Development and Demonstration of an Explicit Lumped-Parameter Biofilter Model and Design Equation Incorporating Monod Kinetics, 208

Lagrangian Approach
Prediction of Pressure Drop in an Orifice Scrubber Based on a Lagrangian Approach, 308

Landfarming
Volatile Hydrocarbon Emissions from a Diesel Fuel-Contaminated Soil Bioremediation Facility, 769

Landfills
The Impact of Municipal Solid Waste Management on Greenhouse Gas Emissions in the United States, 1000
A Novel Design for Anaerobic Chemical Oxygen Demand and Nitrogen Removal from Leachate in a Semi-aerobic Landfill, 1139

Laser-Induced Breakdown Spectroscopy
Evaluation of the Potential of Laser-Induced Breakdown Spectroscopy for Detection of Trace Element in Liquid, 1307

Lavrion Technology and Cultural Park
Levels and Composition of Atmospheric Particulates (PM_{10}) in a Mining–Industrial Site in the City of Lavrion, Greece, 1263

Leachate
A Novel Design for Anaerobic Chemical Oxygen Demand and Nitrogen Removal from Leachate in a Semi-aerobic Landfill, 1139

Leaching
Effects of Solids Concentration on Bacterial Leaching of Heavy Metals from Sewage Sludge, 237
Lead Removal from Synthetic Leachate Matrices by a Novel Ion-Exchange Material, 1075
A Novel Design for Anaerobic Chemical Oxygen Demand and Nitrogen Removal from Leachate in a Semi-aerobic Landfill, 1139

Lead
Lead Removal from Synthetic Leachate Matrices by a Novel Ion-Exchange Material, 1075

Lesair
Particle Size Relationships at the Fresno Supersite, 822

Limestone Scrubbing
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912

Lipids
Use of Treated Bark for the Removal of Lipids from Water, 76

Liquid Sample
Evaluation of the Potential of Laser-Induced Breakdown Spectroscopy for Detection of Trace Element in Liquid, 1307

Long-Range Transport
Regional Transport and Urban Contributions to Fine Particle Concentrations in Southeastern Canada, 855

Long-Term Stability
Release of Mercury Vapor from Coal Combustion Ash, 927

Lumped Parameter
Development and Demonstration of an Explicit Lumped-Parameter Biofilter Model and Design Equation Incorporating Monod Kinetics, 208

Mass Transfer
Development and Demonstration of an Explicit Lumped-Parameter Biofilter Model and Design Equation Incorporating Monod Kinetics, 208

Materials Separation
Use of Treated Bark for the Removal of Lipids from Water, 76

Measurement Techniques
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3

Quantitative Analysis of Environmental Factors in Differential Weighing of Blank Teflon Filters, 134
Air Intake Contamination by Building Exhausts: Tracer Gas Investigation of Atmospheric Dispersion Models in the Urban Environment, 160
Preparing to Measure the Effects of the NO_x SIP Call—Methods for Ambient Air Monitoring of NO, NO_2, NO_y, and Individual NO_z Species, 542
An Automatic Sampler for Measurement of Dust-Deposition Rates around Fugitive Sources, 789
Observations on the Suitability of the Aethalometer for Vehicular and Workplace Monitoring, 1258
Electrostatic Precipitation of Ultrafine Particles Enhanced by Simultaneous Diffusional Deposition on Wire Screens, 1342

Medical Waste
Establishing the Propensity for Dioxin Formation Using a Plume Temperature Model for Medical Waste Incinerator Emissions in Developing Countries, 811

Mercury
Simultaneous Control of Hg^0, SO_2, and NO_x by Novel Oxidized Calcium-Based Sorbents, 273
Modeling Assessment of Air Emission Flux of Mercury from Soils in Terrestrial Landscape Components: Model Tests and Sensitivities, 339
A Mechanism for Mercury Oxidation in Coal-Derived Exhausts, 894
Assessing Sorbents for Mercury Control in Coal-Combustion Flue Gas, 902
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Full-Scale Evaluation of Mercury Control with Sorbent Injection and COHPAC at Alabama Power E.C. Gaston, 918
Release of Mercury Vapor from Coal Combustion Ash, 927
Control of Mercury Emissions from a Municipal Solid Waste Incinerator in Japan, 931
Effect of NO_x Control Processes on Mercury Speciation in Utility Flue Gas, 941
Hg Reactions in the Presence of Chlorine Species: Homogeneous Gas Phase and Heterogeneous Gas-Solid Phase, 1316

Mercury Speciation
Effect of NO_x Control Processes on Mercury Speciation in Utility Flue Gas, 941

Mercury Vapor
Release of Mercury Vapor from Coal Combustion Ash, 927

Metals
Levels and Composition of Atmospheric Particulates (PM_{10}) in a Mining–Industrial Site in the City of Lavrion, Greece, 1263

Meteorological Conditions
Respirable Particulate Matter at an Urban and Nearby Industrial Location: Concentrations and Variability and Synoptic Weather Conditions during High Pollution Episodes, 287
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
On the Relationship between Acid Rain and Cloud Type, 334
Regional Transport and Urban Contributions to Fine Particle Concentrations in Southeastern Canada, 855

Methanol
Regeneration of a Compost Biofilter Degrading High Loads of Ammonia by Addition of Gaseous Methanol, 796

Metropolitan Areas
Using Continuous $PM_{2.5}$ Monitoring Data to Report an Air Quality Index, 104
An Examination of the 6:00 a.m.–9:00 a.m. Measurements of Ozone Precursors in the New York City Metropolitan Area, 181
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Regional Transport and Urban Contributions to Fine Particle Concentrations in Southeastern Canada, 855
Concentration and Size Distribution of Ultrafine Particles Near a Major Highway, 1032

Mexico
Measurements of Personal Exposure to Nitrogen Dioxide in Four Mexican Cities in 1996, 50
Contribution of the Gasoline Distribution Cycle to Volatile Organic Compound Emissions in the Metropolitan Area of Mexico City, 535

Micrometeorological Measurements
Volatile Hydrocarbon Emissions from a Diesel Fuel-Contaminated Soil Bioremediation Facility, 769

Mobile Sources
Hot Emission Model for Mobile Sources: Application to the Metropolitan Region of the City of Santiago, Chile, 167
Real-World Vehicle Emissions: A Summary of the Eleventh Coordinating Research Council On-Road Vehicle Emissions Workshop, 220
Secondary Organic Aerosol Formation from the Irradiation of Simulated Automobile Exhaust, 259
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Measurement and Three-Dimensional Modeling of Airflow and Pollutant Dispersion in an Undersea Traffic Tunnel, 349
On-Road Facility to Measure and Characterize Emissions from Heavy-Duty Diesel Vehicles, 388
Quantification of Variability and Uncertainty in Lawn and Garden Equipment NO_x and Total Hydrocarbon Emission Factors, 435
A Reevaluation of Carbon Monoxide: Past Trends, Future Concentrations, and Implications for Conformity "Hot-Spot" Policies, 1012
Effects of Engine Speed and Accessory Load on Idling Emissions from Heavy-Duty Diesel Truck Engines, 1026
Concentration and Size Distribution of Ultrafine Particles Near a Major Highway, 1032
The Effect of Repairs on Tailpipe Emissions for On-Board Diagnostics II-Equipped Vehicles with the Malfunction Indicator Light Illuminated, 1054
Controlling Air Pollution from Passenger Ferries: Cost-Effectiveness of Seven Technological Options, 1399

Modeling
Air Intake Contamination by Building Exhausts: Tracer Gas Investigation of Atmospheric Dispersion Models in the Urban Environment, 160
Development and Demonstration of an Explicit Lumped-Parameter Biofilter Model and Design Equation Incorporating Monod Kinetics, 208
An Atmospheric Dispersion Model for the Environmental Impact Assessment of Thermal Power Plants in Japan—A Method for Evaluating Topographical Effects, 313
Modeling Assessment of Air Emission Flux of Mercury from Soils in Terrestrial Landscape Components: Model Tests and Sensitivities, 339

Measurement and Three-Dimensional Modeling of Airflow and Pollutant Dispersion in an Undersea Traffic Tunnel, 349
Shortest Service Location Model for Planning Waste Pickup Locations, 585
Defining the Photochemical Contribution to Particulate Matter in Urban Areas Using Time-Series Analysis, 593
A Mechanism for Mercury Oxidation in Coal-Derived Exhausts, 894
Forecasting Peak Daily Ozone Levels–I. A Regression with Time Series Errors Model Having a Principal Component Trigger to Fit 1991 Ozone Levels, 1064
Identification of Sources Contributing to Mid-Atlantic Regional Aerosol, 1186
An Evaluation of the UAM-V Predicted Concentrations of Carbon Monoxide and Reactive Nitrogen Compounds over the Eastern United States during Summer 1995, 1324
Determination of Atmospheric Nitrogen Input to Lake Greenwood, South Carolina—I. PM Measurements, 1411
Rapidly Locating and Characterizing Pollutant Releases in Buildings, 1422
Methodology for Siting Ambient Air Monitors at the Neighborhood Scale, 1433

Monitoring
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3
Using Continuous $PM_{2.5}$ Monitoring Data to Report an Air Quality Index, 104
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Spatial Characteristics of Fine Particulate Matter: Identifying Representative Monitoring Locations in Seattle, Washington, 324
Diagnostic Study of Critical Circuits of the Kraft Pulp Production Process Considering the Environmental Aspects, 765
An Automatic Sampler for Measurement of Dust-Deposition Rates around Fugitive Sources, 789
Sampling Frequency Guidance for Ambient Air Toxics Monitoring, 867
Development and Laboratory Performance Evaluation of a Personal Cascade Impactor, 1230
Observations on the Suitability of the Aethalometer for Vehicular and Workplace Monitoring, 1258
Methodology for Siting Ambient Air Monitors at the Neighborhood Scale, 1433

Monod
Development and Demonstration of an Explicit Lumped-Parameter Biofilter Model and Design Equation Incorporating Monod Kinetics, 208

Monte Carlo Methods
Rapidly Locating and Characterizing Pollutant Releases in Buildings, 1422

Motor Vehicles
Factors Affecting Heavy-Duty Diesel Vehicle Emissions, 84
Hot Emission Model for Mobile Sources: Application to the Metropolitan Region of the City of Santiago, Chile, 167
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
A Reevaluation of Carbon Monoxide: Past Trends, Future Concentrations, and Implications for Conformity "Hot-Spot" Policies, 1012
Effects of Engine Speed and Accessory Load on Idling Emissions from Heavy-Duty Diesel Truck Engines, 1026
Concentration and Size Distribution of Ultrafine Particles Near a Major Highway, 1032
The Effect of Repairs on Tailpipe Emissions for On-Board Diagnostics II-Equipped Vehicles with the Malfunction Indicator Light Illuminated, 1054

Multipollutant Mercury
Simultaneous Control of Hg^0, SO_2, and NO_x by Novel Oxidized Calcium-Based Sorbents, 273

Municipal Solid Waste
Combined Simulation of Combustion and Gas Flow in a Grate-Type Incinerator, 189
Shortest Service Location Model for Planning Waste Pickup Locations, 585
Stabilization of APC Residues from Waste Incineration with Ferrous Sulfate on a Semi-Industrial Scale, 722
Control of Mercury Emissions from a Municipal Solid Waste Incinerator in Japan, 931
The Impact of Municipal Solid Waste Management on Greenhouse Gas Emissions in the United States, 1000
Hg Reactions in the Presence of Chlorine Species: Homogeneous Gas Phase and Heterogeneous Gas-Solid Phase, 1316
Removal of PCDD/F from Incinerator Flue Gases by Entrained-Phase Adsorption, 1378

NAAQS
Design of a Cost-Effective Weighing Facility for $PM_{2.5}$ Quality Assurance, 506
Estimation of Ambient $PM_{2.5}$ Concentrations in Maryland and Verification by Measured Values, 1161
Trends and Variability of Ground-Level O_3 in Connecticut over the Period 1981–1997, 1354

Natural Ventilation
Numerical Evaluation of the Effect of Traffic Pollution on Indoor Air Quality of a Naturally Ventilated Building, 1043

NIOSH 5040 Method
Observations on the Suitability of the Aethalometer for Vehicular and Workplace Monitoring, 1258

Nitrate Nitrogen
A Novel Design for Anaerobic Chemical Oxygen Demand and Nitrogen Removal from Leachate in a Semi-aerobic Landfill, 1139

Nitrogen Dioxide
Measurements of Personal Exposure to Nitrogen Dioxide in Four Mexican Cities in 1996, 50
Source Extraction Information from Air Quality Data Monitored in an Argentinean Steel Mill, 140
The Utilization of Catalyst Sorbent in Scrubbing Acid Gases from Incineration Flue Gas, 449
Meta-Analysis of Time-Series Studies of Air Pollution and Mortality: Effects of Gases and Particles and the Influence of Cause of Death, Age, and Season, 470
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
Preparing to Measure the Effects of the NO_x SIP Call—Methods for Ambient Air Monitoring of NO, NO_2, NO_y, and Individual NO_z Species, 542
An Evaluation of the UAM-V Predicted Concentrations of Carbon Monoxide and Reactive Nitrogen Compounds over the Eastern United States during Summer 1995, 1324
Determination of Atmospheric Nitrogen Input to Lake Greenwood, South Carolina—I. PM Measurements, 1411

Nitrogen Oxides
Modeling the Benefits of Power Plant Emission Controls in Massachusetts, 5
Factors Affecting Heavy-Duty Diesel Vehicle Emissions, 84
Hot Emission Model for Mobile Sources: Application to the Metropolitan Region of the City of Santiago, Chile, 167
An Examination of the 6:00 a.m.–9:00 a.m. Measurements of Ozone Precursors in the New York City Metropolitan Area, 181
Secondary Organic Aerosol Formation from the Irradiation of Simulated Automobile Exhaust, 259
On-Road Facility to Measure and Characterize Emissions from Heavy-Duty Diesel Vehicles, 388
Quantification of Variability and Uncertainty in Lawn and Garden Equipment NO_x and Total Hydrocarbon Emission Factors, 435
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
Preparing to Measure the Effects of the NO_x SIP Call—Methods for Ambient Air Monitoring of NO, NO_2, NO_y, and Individual NO_z Species, 542
Quantification of Variability and Uncertainty in Air Pollutant Emission Inventories: Method and Case Study for Utility NO_x Emissions, 1083
A Novel Design for Anaerobic Chemical Oxygen Demand and Nitrogen Removal from Leachate in a Semi-aerobic Landfill, 1139
An Evaluation of the UAM-V Predicted Concentrations of Carbon Monoxide and Reactive Nitrogen Compounds over the Eastern United States during Summer 1995, 1324

Nitrous Oxide
Surface Flux Measurements of CO_2 and N_2O from a Dried Rice Paddy in Japan during a Fallow Winter Season, 416

Nonattainment
Forecasting Peak Daily Ozone Levels–I. A Regression with Time Series Errors Model Having a Principal Component Trigger to Fit 1991 Ozone Levels, 1064
Estimation of Ambient $PM_{2.5}$ Concentrations in Maryland and Verification by Measured Values, 1161

Nonmethane Organic Gases
An Examination of the 6:00 a.m.–9:00 a.m. Measurements of Ozone Precursors in the New York City Metropolitan Area, 181

Numerical Simulation
Combined Simulation of Combustion and Gas Flow in a Grate-Type Incinerator, 189

Occupant Behavior
The Effect of Opening Windows on Air Change Rates in Two Homes, 147

Odors
Degradation Characteristics of Toluene, Benzene, Ethylbenzene, and Xylene by *Stenotrophomonas maltophilia* T3-c, 400
Wet Scrubber Analysis of Volatile Organic Compound Removal in the Rendering Industry, 459
Water Transformation in the Media of Biofilters Controlled by *Rhodococcus fascians* in Treating an Ethyl Acetate-Contaminated Airstream, 511
Diagnostic Study of Critical Circuits of the Kraft Pulp Production Process Considering the Environmental Aspects, 765
Photocatalytic Oxidation of Volatile Organic Compounds Using Fluorescent Visible Light, 845
The Catalytic Incineration of Styrene over an Mn_2O_3/Fe_2O_3 Catalyst, 1153

Onboard Diagnostics
The Effect of Repairs on Tailpipe Emissions for On-Board Diagnostics II-Equipped Vehicles with the Malfunction Indicator Light Illuminated, 1054

Optimization
Shortest Service Location Model for Planning Waste Pickup Locations, 585

Orifice Scrubber
Prediction of Pressure Drop in an Orifice Scrubber Based on a Lagrangian Approach, 308

Oxidant
Simultaneous Control of Hg^0, SO_2, and NO_x by Novel Oxidized Calcium-Based Sorbents, 273

Oxidation
Effect of NO_x Control Processes on Mercury Speciation in Utility Flue Gas, 941

Ozone
Slurry-Phase Ozonation for Remediation of Sediments Contaminated by Polycyclic Aromatic Hydrocarbons, 58
An Examination of the 6:00 a.m.–9:00 a.m. Measurements of Ozone Precursors in the New York City Metropolitan Area, 181
Meta-Analysis of Time-Series Studies of Air Pollution and Mortality: Effects of Gases and Particles and the Influence of Cause of Death, Age, and Season, 470
Defining the Photochemical Contribution to Particulate Matter in Urban Areas Using Time-Series Analysis, 593

Ozone, Tropospheric
Meta-Analysis of Time-Series Studies of Air Pollution and Mortality: Effects of Gases and Particles and the Influence of Cause of Death, Age, and Season, 470
Forecasting Peak Daily Ozone Levels–I. A Regression with Time Series Errors Model Having a Principal Component Trigger to Fit 1991 Ozone Levels, 1064
Trends and Variability of Ground-Level O_3 in Connecticut over the Period 1981–1997, 1354

Palladium Catalyst
Catalytic Oxidation of Organic Compounds in Incineration Flue Gas by a Commercial Palladium Catalyst, 198

Particles
Continuous Monitoring of Ultrafine, Fine, and Coarse Particles in a Residence for 18 Months in 1999–2000, 828

Particles, Fine
Quantitative Analysis of Environmental Factors in Differential Weighing of Blank Teflon Filters, 134
Continuous Monitoring of Ultrafine, Fine, and Coarse Particles in a Residence for 18 Months in 1999–2000, 828

Particles, Ultrafine
Continuous Monitoring of Ultrafine, Fine, and Coarse Particles in a Residence for 18 Months in 1999–2000, 828
Concentration and Size Distribution of Ultrafine Particles Near a Major Highway, 1032

Particulate Matter (PM)
Comparison of Fine Particles and the Relationship between Particle Variations and Meteorology at an Urban Site and a Remote Site in the Eastern United States, 573
Roadside Particulate Air Pollution in Bangkok, 1102

Passive Samplers
Continuous Monitoring of Ultrafine, Fine, and Coarse Particles in a Residence for 18 Months in 1999–2000, 828
Survey of Waste Comminglers' VOC Exposures, 1298

Patterns
Measurements of Personal Exposure to Nitrogen Dioxide in Four Mexican Cities in 1996, 50

PCDD/F
Removal of PCDD/F from Incinerator Flue Gases by Entrained-Phase Adsorption, 1378

Pelletized Medium
Development and Demonstration of an Explicit Lumped-Parameter Biofilter Model and Design Equation Incorporating Monod Kinetics, 208

Permitting
Development of Emission Factors for Polycarbonate Processing, 781

Personal Exposure
Measurements of Personal Exposure to Nitrogen Dioxide in Four Mexican Cities in 1996, 50
Roadside Particulate Air Pollution in Bangkok, 1102

Personnel Protection
Survey of Waste Comminglers' VOC Exposures, 1298

Petroleum Refinery Emissions
Degradation Characteristics of Toluene, Benzene, Ethylbenzene, and Xylene by *Stenotrophomonas maltophilia* T3-c, 400

Photochemical Pollutants
An Examination of the 6:00 a.m.–9:00 a.m. Measurements of Ozone Precursors in the New York City Metropolitan Area, 181
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Defining the Photochemical Contribution to Particulate Matter in Urban Areas Using Time-Series Analysis, 593
Sources of Atmospheric Carbonaceous Particulate Matter in Pittsburgh, Pennsylvania, 732
Online Hourly Determination of 62 VOCs in Ambient Air: System Evaluation and Comparison with Another Two Analytical Techniques, 1176

Pilot Scale
Stabilization of APC Residues from Waste Incineration with Ferrous Sulfate on a Semi-Industrial Scale, 722

$PM_{2.5}$
Modeling the Benefits of Power Plant Emission Controls in Massachusetts, 5
Using Continuous $PM_{2.5}$ Monitoring Data to Report an Air Quality Index, 104
Quantitative Analysis of Environmental Factors in Differential Weighing of Blank Teflon Filters, 134
Spatial Characteristics of Fine Particulate Matter: Identifying Representative Monitoring Locations in Seattle, Washington, 324
Design of a Cost-Effective Weighing Facility for $PM_{2.5}$ Quality Assurance, 506
Roadside Particulate Air Pollution in Bangkok, 1102
Estimation of Ambient $PM_{2.5}$ Concentrations in Maryland and Verification by Measured Values, 1161
Determination of Atmospheric Nitrogen Input to Lake Greenwood, South Carolina—I. PM Measurements, 1411

PM_{10}
Aerosol Laser Ablation Mass Spectrometry of Suspended Powders from PM Sources and Its Implications to Receptor Modeling, 27
Factors Affecting Heavy-Duty Diesel Vehicle Emissions, 84
Quantitative Analysis of Environmental Factors in Differential Weighing of Blank Teflon Filters, 134
Source Extraction Information from Air Quality Data Monitored in an Argentinean Steel Mill, 140
Respirable Particulate Matter at an Urban and Nearby Industrial Location: Concentrations and Variability and Synoptic Weather Conditions during High Pollution Episodes, 287
Spatial Characteristics of Fine Particulate Matter: Identifying Representative Monitoring Locations in Seattle, Washington, 324
Spatial Differences in Outdoor PM_{10} Mass and Aerosol Composition in Mexico City, 423
Meta-Analysis of Time-Series Studies of Air Pollution and Mortality: Effects of Gases and Particles and the Influence of Cause of Death, Age, and Season, 470
Comparison of Fine Particles and the Relationship between Particle Variations and Meteorology at an Urban Site and a Remote Site in the Eastern United States, 573
Defining the Photochemical Contribution to Particulate Matter in Urban Areas Using Time-Series Analysis, 593
Evaluation of Artificial Neural Networks for Fine Particulate Pollution (PM_{10} and $PM_{2.5}$) Forecasting, 1096
Roadside Particulate Air Pollution in Bangkok, 1102
Estimation of Ambient $PM_{2.5}$ Concentrations in Maryland and Verification by Measured Values, 1161
Levels and Composition of Atmospheric Particulates (PM_{10}) in a Mining–Industrial Site in the City of Lavrion, Greece, 1263
Methodology for Siting Ambient Air Monitors at the Neighborhood Scale, 1433

PM, Secondary
Defining the Photochemical Contribution to Particulate Matter in Urban Areas Using Time-Series Analysis, 593

PM Trends
Comparison of Fine Particles and the Relationship between Particle Variations and Meteorology at an Urban Site and a Remote Site in the Eastern United States, 573

Polar Organic Compounds
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3
Secondary Organic Aerosol Formation from the Irradiation of Simulated Automobile Exhaust, 259

Policy Decision-Making
A Reevaluation of Carbon Monoxide: Past Trends, Future Concentrations, and Implications for Conformity "Hot-Spot" Policies, 1012

Pollutant Concentration
Respirable Particulate Matter at an Urban and Nearby Industrial Location: Concentrations and Variability and Synoptic Weather Conditions during High Pollution Episodes, 287
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297

An Atmospheric Dispersion Model for the Environmental Impact Assessment of Thermal Power Plants in Japan—A Method for Evaluating Topographical Effects, 313
On the Relationship between Acid Rain and Cloud Type, 334
Evaluation of the RAMS Continuous Monitor for Determination of $PM_{2.5}$ Mass Including Semi-Volatile Material in Philadelphia, PA, 563
Development and Laboratory Performance Evaluation of a Personal Cascade Impactor, 1230

Pollutant Dispersion
Numerical Evaluation of the Effect of Traffic Pollution on Indoor Air Quality of a Naturally Ventilated Building, 1043

Pollution Control Equipment
Levels and Characteristic Homologue Patterns of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in Various Incinerator Emissions and in Air Collected Near an Incinerator, 69
Prediction of Pressure Drop in an Orifice Scrubber Based on a Lagrangian Approach, 308
A Method for Predicting the Performance of Packed Columns Operating with a Reactive Scrubbing Liquid That Control Gaseous Air Pollutants, 396
Water Transformation in the Media of Biofilters Controlled by *Rhodococcus fascians* in Treating an Ethyl Acetate-Contaminated Airstream, 511
Control of Mercury Emissions from a Municipal Solid Waste Incinerator in Japan, 931
Electrostatic Precipitation of Ultrafine Particles Enhanced by Simultaneous Diffusional Deposition on Wire Screens, 1342

Pollution Episodes
Respirable Particulate Matter at an Urban and Nearby Industrial Location: Concentrations and Variability and Synoptic Weather Conditions during High Pollution Episodes, 287

Pollution Prevention
Decomposition of SF_6 in an RF Plasma Environment, 1274

Polycarbonate
Development of Emission Factors for Polycarbonate Processing, 781

Polycyclic Aromatic Hydrocarbons
Large-Volume Injection PTV-GC-MS Analysis of Polycyclic Aromatic Hydrocarbons in Air and Sediment Samples, 19
Slurry-Phase Ozonation for Remediation of Sediments Contaminated by Polycyclic Aromatic Hydrocarbons, 58
Catalytic Oxidation of Organic Compounds in Incineratoin Flue Gas by a Commercial Palladium Catalyst, 198
Volatilization of Contaminants from Suspended Sediment in a Water Column during Dredging, 1214

Polymer Recycling
Evolution and Kinetics of Volatile Organic Compounds Generated during Low-Temperature Polymer Degradation, 95

Polymers
Evolution and Kinetics of Volatile Organic Compounds Generated during Low-Temperature Polymer Degradation, 95

Power Plants
Modeling the Benefits of Power Plant Emission Controls in Massachusetts, 5
Respirable Particulate Matter at an Urban and Nearby Industrial Location: Concentrations and Variability and Synoptic Weather Conditions during High Pollution Episodes, 287
An Atmospheric Dispersion Model for the Environmental Impact Assessment of Thermal Power Plants in Japan—A Method for Evaluating Topographical Effects, 313
An Automatic Sampler for Measurement of Dust-Deposition Rates around Fugitive Sources, 789
A Mechanism for Mercury Oxidation in Coal-Derived Exhausts, 894
Assessing Sorbents for Mercury Control in Coal-Combustion Flue Gas, 902
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Quantification of Variability and Uncertainty in Air Pollutant Emission Inventories: Method and Case Study for Utility NO_x Emissions, 1083

PTV Inlet
Large-Volume Injection PTV-GC-MS Analysis of Polycyclic Aromatic Hydrocarbons in Air and Sediment Samples, 19

Public Health
Meta-Analysis of Time-Series Studies of Air Pollution and Mortality: Effects of Gases and Particles and the Influence of Cause of Death, Age, and Season, 470

Pulp and Paper
Effects of Nitrogen and Oxygen on Biofilter Performance, 279

Quality Control
Quantitative Analysis of Environmental Factors in Differential Weighing of Blank Teflon Filters, 134

Reaction Mechanism
A Mechanism for Mercury Oxidation in Coal-Derived Exhausts, 894

Recycling
Effects of Solids Concentration on Bacterial Leaching of Heavy Metals from Sewage Sludge, 237
The Impact of Municipal Solid Waste Management on Greenhouse Gas Emissions in the United States, 1000

Regulations
A Reevaluation of Carbon Monoxide: Past Trends, Future Concentrations, and Implications for Conformity "Hot-Spot" Policies, 1012

Remediation
Effects of Solids Concentration on Bacterial Leaching of Heavy Metals from Sewage Sludge, 237
Volatilization of Contaminants from Suspended Sediment in a Water Column during Dredging, 1214

Rendering
Wet Scrubber Analysis of Volatile Organic Compound Removal in the Rendering Industry, 459

Research and Development
Effects of Nitrogen and Oxygen on Biofilter Performance, 279
Shortest Service Location Model for Planning Waste Pickup Locations, 585

Residences
The Effect of Opening Windows on Air Change Rates in Two Homes, 147

Residues
Stabilization of APC Residues from Waste Incineration with Ferrous Sulfate on a Semi-Industrial Scale, 722

Respirable Particulate Matter
Defining the Photochemical Contribution to Particulate Matter in Urban Areas Using Time-Series Analysis, 593
Prediction of Ambient PM_{10} and Toxic Metals Using Artificial Neural Networks, 805

Resuspension
Volatilization of Contaminants from Suspended Sediment in a Water Column during Dredging, 1214

Retrofits
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521

Roadways
Concentration and Size Distribution of Ultrafine Particles Near a Major Highway, 1032

Rural Sites
Surface Flux Measurements of CO_2 and N_2O from a Dried Rice Paddy in Japan during a Fallow Winter Season, 416
Estimation of Ambient $PM_{2.5}$ Concentrations in Maryland and Verification by Measured Values, 1161

Samplers, Mobile
Quantitative Analysis of Environmental Factors in Differential Weighing of Blank Teflon Filters, 134
Development and Laboratory Performance Evaluation of a Personal Cascade Impactor, 1230

Samplers, Passive
An Automatic Sampler for Measurement of Dust-Deposition Rates around Fugitive Sources, 789

Sampling
Spatial Characteristics of Fine Particulate Matter: Identifying Representative Monitoring Locations in Seattle, Washington, 324
On-Road Facility to Measure and Characterize Emissions from Heavy-Duty Diesel Vehicles, 388
Evaluation of the RAMS Continuous Monitor for Determination of $PM_{2.5}$ Mass Including Semi-Volatile Material in Philadelphia, PA, 563
An Automatic Sampler for Measurement of Dust-Deposition Rates around Fugitive Sources, 789
Development and Laboratory Performance Evaluation of a Personal Cascade Impactor, 1230
Determination of Atmospheric Nitrogen Input to Lake Greenwood, South Carolina—I. PM Measurements, 1411

SCR
Effect of NO_x Control Processes on Mercury Speciation in Utility Flue Gas, 941

Scrubbers
Spray Charging of Droplets in a Wet Scrubber, 175
A Method for Predicting the Performance of Packed Columns Operating with a Reactive Scrubbing Liquid That Control Gaseous Air Pollutants, 396
The Utilization of Catalyst Sorbent in Scrubbing Acid Gases from Incineration Flue Gas, 449
Wet Scrubber Analysis of Volatile Organic Compound Removal in the Rendering Industry, 459

Seasonal Effects
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3
Respirable Particulate Matter at an Urban and Nearby Industrial Location: Concentrations and Variability and Synoptic Weather Conditions during High Pollution Episodes, 287
On the Relationship between Acid Rain and Cloud Type, 334

Sediment
Large-Volume Injection PTV-GC-MS Analysis of Polycyclic Aromatic Hydrocarbons in Air and Sediment Samples, 19

Semiaerobic Landfill
A Novel Design for Anaerobic Chemical Oxygen Demand and Nitrogen Removal from Leachate in a Semiaerobic Landfill, 1139

Semidry Air Pollution Control Residues
Stabilization of APC Residues from Waste Incineration with Ferrous Sulfate on a Semi-Industrial Scale, 722

Sewage Sludge
Stabilization of APC Residues from Waste Incineration with Ferrous Sulfate on a Semi-Industrial Scale, 722

Size Distribution
Particle Size Relationships at the Fresno Supersite, 822

SMPS
Particle Size Relationships at the Fresno Supersite, 822

Soil
Slurry-Phase Ozonation for Remediation of Sediments Contaminated by Polycyclic Aromatic Hydrocarbons, 58
Modeling Assessment of Air Emission Flux of Mercury from Soils in Terrestrial Landscape Components: Model Tests and Sensitivities, 339

Soil-Gas
On the Relationship between Acid Rain and Cloud Type, 334
Surface Flux Measurements of CO_2 and N_2O from a Dried Rice Paddy in Japan during a Fallow Winter Season, 416

Soil Washing
Lead Removal from Synthetic Leachate Matrices by a Novel Ion-Exchange Material, 1075

Solid Waste
The Impact of Municipal Solid Waste Management on Greenhouse Gas Emissions in the United States, 1000

Soot
Spatial Differences in Outdoor PM_{10} Mass and Aerosol Composition in Mexico City, 423
An Evaluation of the Tapered Element Oscillating Microbalance Method for Measuring Diesel Particulate Emissions, 1362

Sorbent
Simultaneous Control of Hg^0, SO_2, and NO_x by Novel Oxidized Calcium-Based Sorbents, 273

Sorbent Injection
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
Assessing Sorbents for Mercury Control in Coal-Combustion Flue Gas, 902

Source Profiles
Aerosol Laser Ablation Mass Spectrometry of Suspended Powders from PM Sources and Its Implications to Receptor Modeling, 27
Identification of Sources Contributing to Mid-Atlantic Regional Aerosol, 1186

South Coast Air Basin
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297

Specific Surface
Development and Demonstration of an Explicit Lumped-Parameter Biofilter Model and Design Equation Incorporating Monod Kinetics, 208

Spray Electrification
Spray Charging of Droplets in a Wet Scrubber, 175

Stabilization
Stabilization of APC Residues from Waste Incineration with Ferrous Sulfate on a Semi-Industrial Scale, 722

Stack Height
Air Intake Contamination by Building Exhausts: Tracer Gas Investigation of Atmospheric Dispersion Models in the Urban Environment, 160

State Implementation Plans (SIPs)
Identification of Sources Contributing to Mid-Atlantic Regional Aerosol, 1186

Stationary Sources
Source Extraction Information from Air Quality Data Monitored in an Argentinean Steel Mill, 140

Statistical Analysis
Forecasting Peak Daily Ozone Levels–I. A Regression with Time Series Errors Model Having a Principal Component Trigger to Fit 1991 Ozone Levels, 1064

Sulfur Dioxide
Modeling the Benefits of Power Plant Emission Controls in Massachusetts, 5
The Utilization of Catalyst Sorbent in Scrubbing Acid Gases from Incineration Flue Gas, 449
Meta-Analysis of Time-Series Studies of Air Pollution and Mortality: Effects of Gases and Particles and the Influence of Cause of Death, Age, and Season, 470
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
Estimation of Ambient $PM_{2.5}$ Concentrations in Maryland and Verification by Measured Values, 1161
Pore Structure Effects on Ca-Based Sorbent Sulfation Capacity at Medium Temperatures: Activated Carbon as Sorbent/Catalyst Support, 1281

Supersite
Particle Size Relationships at the Fresno Supersite, 822

Suspended Solids
Volatilization of Contaminants from Suspended Sediment in a Water Column during Dredging, 1214

Synoptic Conditions
Respirable Particulate Matter at an Urban and Nearby Industrial Location: Concentrations and Variability and Synoptic Weather Conditions during High Pollution Episodes, 287

Technology Development
Slurry-Phase Ozonation for Remediation of Sediments Contaminated by Polycyclic Aromatic Hydrocarbons, 58
Assessing Sorbents for Mercury Control in Coal-Combustion Flue Gas, 902
Microfibrous Mesh Coated with Titanium Dioxide: A Self-Sterilizing, Self-Cleaning Filter, 1206

Temperature
Water Transformation in the Media of Biofilters Controlled by *Rhodococcus fascians* in Treating an Ethyl Acetate-Contaminated Airstream, 511
Trends and Variability of Ground-Level O_3 in Connecticut over the Period 1981–1997, 1354

Thermal Carbon Analysis
Evaluation of OC/EC Speciation by Thermal Manganese Dioxide Oxidation and the IMPROVE Method, 1333

Thermal Manganese Dioxide Oxidation (TMO)
Evaluation of OC/EC Speciation by Thermal Manganese Dioxide Oxidation and the IMPROVE Method, 1333

Thermal Optical Reflectance (TOR)
Evaluation of OC/EC Speciation by Thermal Manganese Dioxide Oxidation and the IMPROVE Method, 1333

Thermal Treatment
The Catalytic Incineration of Styrene over an Mn_2O_3/Fe_2O_3 Catalyst, 1153

Time-Activity
Measurements of Personal Exposure to Nitrogen Dioxide in Four Mexican Cities in 1996, 50

Time Series
Defining the Photochemical Contribution to Particulate Matter in Urban Areas Using Time-Series Analysis, 593
Forecasting Peak Daily Ozone Levels–I. A Regression with Time Series Errors Model Having a Principal Component Trigger to Fit 1991 Ozone Levels, 1064

Toluene
Development and Demonstration of an Explicit Lumped-Parameter Biofilter Model and Design Equation Incorporating Monod Kinetics, 208

Total Emission Control
The Wind-Frequency Allocation Method on Discharge Loading of Function Zones, 714

Toxic Air Pollutants
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Degradation Characteristics of Toluene, Benzene, Ethylbenzene, and Xylene by *Stenotrophomonas maltophilia* T3-c, 400
Economics of an Integrated Approach to Control SO_2, NO_x, HCl, and Particulate Emissions from Power Plants, 521
Regeneration of a Compost Biofilter Degrading High Loads of Ammonia by Addition of Gaseous Methanol, 796
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
The Catalytic Incineration of Styrene over an Mn_2O_3/Fe_2O_3 Catalyst, 1153
Decomposition of SF_6 in an RF Plasma Environment, 1274
Hg Reactions in the Presence of Chlorine Species: Homogeneous Gas Phase and Heterogeneous Gas-Solid Phase, 1316

Toxic Gases
Diagnostic Study of Critical Circuits of the Kraft Pulp Production Process Considering the Environmental Aspects, 765
The Catalytic Incineration of Styrene over an Mn_2O_3/Fe_2O_3 Catalyst, 1153
Decomposition of SF_6 in an RF Plasma Environment, 1274

Toxic Metals
Effects of Solids Concentration on Bacterial Leaching of Heavy Metals from Sewage Sludge, 237
Prediction of Ambient PM_{10} and Toxic Metals Using Artificial Neural Networks, 805
The Fate and Behavior of Mercury in Coal-Fired Power Plants, 912
Control of Mercury Emissions from a Municipal Solid Waste Incinerator in Japan, 931
Lead Removal from Synthetic Leachate Matrices by a Novel Ion-Exchange Material, 1075

Toxics
Prediction of Ambient PM_{10} and Toxic Metals Using Artificial Neural Networks, 805

Tracer Gas Measurements
The Effect of Opening Windows on Air Change Rates in Two Homes, 147

Tracer Techniques
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3

Tracers
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3

Traffic
Measurement and Three-Dimensional Modeling of Airflow and Pollutant Dispersion in an Undersea Traffic Tunnel, 349
Concentration and Size Distribution of Ultrafine Particles Near a Major Highway, 1032
Roadside Particulate Air Pollution in Bangkok, 1102
Methodology for Siting Ambient Air Monitors at the Neighborhood Scale, 1433

Traffic Pollution
Roadside Particulate Air Pollution in Bangkok, 1102

Trajectory Analysis
Regional Transport and Urban Contributions to Fine Particle Concentrations in Southeastern Canada, 855

Treatment
Stabilization of APC Residues from Waste Incineration with Ferrous Sulfate on a Semi-Industrial Scale, 722

Treatment, Storage, and Disposal
Survey of Waste Comminglers' VOC Exposures, 1298

Treatment Technologies
Use of Treated Bark for the Removal of Lipids from Water, 76
Effects of Nitrogen and Oxygen on Biofilter Performance, 279
Photocatalytic Oxidation of Volatile Organic Compounds Using Fluorescent Visible Light, 845
Lead Removal from Synthetic Leachate Matrices by a Novel Ion-Exchange Material, 1075
Microfibrous Mesh Coated with Titanium Dioxide: A Self-Sterilizing, Self-Cleaning Filter, 1206
1-Butanol Removal from a Contaminated Airstream under Continuous and Diurnal Loading Conditions, 1288

Trend Analysis
An Examination of the 6:00 a.m.–9:00 a.m. Measurements of Ozone Precursors in the New York City Metropolitan Area, 181
Sector Analysis of pH Values in the Northeastern Region of Puerto Rico, 719
A Reevaluation of Carbon Monoxide: Past Trends, Future Concentrations, and Implications for Conformity "Hot-Spot" Policies, 1012

Trickle Bed
Development and Demonstration of an Explicit Lumped-Parameter Biofilter Model and Design Equation Incorporating Monod Kinetics, 208

Tunnel Ventilation
Measurement and Three-Dimensional Modeling of Airflow and Pollutant Dispersion in an Undersea Traffic Tunnel, 349

UAM-V
An Evaluation of the UAM-V Predicted Concentrations of Carbon Monoxide and Reactive Nitrogen Compounds over the Eastern United States during Summer 1995, 1324

Uncertainty
Modeling the Benefits of Power Plant Emission Controls in Massachusetts, 5
Quantification of Variability and Uncertainty in Lawn and Garden Equipment NO_x and Total Hydrocarbon Emission Factors, 435

Urban Areas
Aerosol Laser Ablation Mass Spectrometry of Suspended Powders from PM Sources and Its Implications to Receptor Modeling, 27
An Examination of the 6:00 a.m.–9:00 a.m. Measurements of Ozone Precursors in the New York City Metropolitan Area, 181
Respirable Particulate Matter at an Urban and Nearby Industrial Location: Concentrations and Variability and Synoptic Weather Conditions during High Pollution Episodes, 287
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Defining the Photochemical Contribution to Particulate Matter in Urban Areas Using Time-Series Analysis, 593
Regional Transport and Urban Contributions to Fine Particle Concentrations in Southeastern Canada, 855

U.S. Environmental Protection Agency (EPA)
Real-Time Indoor and Outdoor Measurements of Black Carbon in an Occupied House: An Examination of Sources, 41
Size Distribution and Diurnal and Seasonal Trends of Ultrafine Particles in Source and Receptor Sites of the Los Angeles Basin, 297
Spatial Differences in Outdoor PM_{10} Mass and Aerosol Composition in Mexico City, 423
Design of a Cost-Effective Weighing Facility for $PM_{2.5}$ Quality Assurance, 506

Utilities
Assessing Sorbents for Mercury Control in Coal-Combustion Flue Gas, 902

Vegetation
Levoglucosan in $PM_{2.5}$ at the Fresno Supersite, 3
Modeling Assessment of Air Emission Flux of Mercury from Soils in Terrestrial Landscape Components: Model Tests and Sensitivities, 339

Ventilation
The Effect of Opening Windows on Air Change Rates in Two Homes, 147
Numerical Evaluation of the Effect of Traffic Pollution on Indoor Air Quality of a Naturally Ventilated Building, 1043

Venturi Scrubber
Prediction of Pressure Drop in an Orifice Scrubber Based on a Lagrangian Approach, 308

Visibility
2002 Critical Review—Visibility: Science and Regulation, 626
2002 Critical Review Discussion—Visibility: Science and Regulation, 973
Just-Noticeable Differences in Atmospheric Haze, 1238

Volatile Organic Compounds (VOCs)
Evolution and Kinetics of Volatile Organic Compounds Generated during Low-Temperature Polymer Degradation, 95
An Examination of the 6:00 a.m.–9:00 a.m. Measurements of Ozone Precursors in the New York City Metropolitan Area, 181
